

Medications

Adding New Medications

 , Search Drug Name (less letter the better), Select Drug and fill out information, SAVE  or SAVE.

Change or Editing Medications

Select Medication, Click , Go through and change or update.

To get more information regarding medication click on  after highlighting the medication.

Delete Medications

Select Medication, Click , Select date stopped or "Wk", Select reason or enter reason, then OK.

You can see what has been "Stopped" by clicking on more options  and then Rx History

Print Med List

Go to Medications on left side of EHR and use the drop down carrot to Current Medications. Click on Print Active or Print Active/Stopped. Select the columns you would like to be shown. Portrait seems to print nicer.

You are able to ADD, Edit, STOP & Delete from here as well.

Print Summary

While on the Summary page click the print button. All "Summary Options" are the same. This gives you all the summary information. Lists and General Information of the client.

Print Facesheet

Printing the Facesheet gives you contact information as well as active programs.

Review Information

There are two ways to review information in the Summary list -  or
