

## Adding and Editing Diagnosis and Z-Codes

Begin by opening the client's chart and going to the Summary section of their chart.

### Adding a New Diagnosis or Z-Code

The list of diagnosis or Z-codes are located in the 'Problem List'. Click on the **+** to add a new diagnosis or Z-Code.

The following box will appear.

Dx Code	Problem Name
G91.2	normal pressure hydrocephalus
E11.9	.Diabetes Mellitus
E11.9	.Diabetes W/O complications

There are two options to search for a Diagnosis or Z-Code.

1. Enter Diagnosis Code or a Z Code in the 'DX Code' box **1** and select go.
2. Search in the 'Search Problem Name' box **2** and select go.

Once you have located the Diagnosis or Z Code complete the bottom of box by selecting the Onset, any comments, the Diagnosis Type and Program Name. Once completed, select save.

### Change or Editing Diagnosis or Z-Code

Select diagnosis or Z-code you would like to edit. Click . Change the necessary details and click the Update button.
